DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11-19 and 27-35, drawn to apparatus, classified in class 83 subclass 412.
 - II. Claims 20-26, drawn to a method for assembling, classified in class 435, subclass 40.52.

The inventions are distinct, each from the other because of the following reasons:

2. Invention I and invention II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could perform a method that includes a work piece other than a tissue sample.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
